Company Profile

The Schunk Group is an international technology group employing around 8,100 people in 29 countries. The company offers a broad spectrum of products and services in the fields of carbon technology and ceramics, environment simulation and air conditioning technology, sintered metal and ultrasonic welding.

The Schunk Group's long-term outlook, first held by Ludwig Schunk over 100 years ago when he founded today's Schunk Group, is crucial for its success.

According to his wishes, "the company must be led in such a way that healthy development and the preservation of independence are paramount." The Schunk Group's long-term goals of financial stability and independence, profitable growth and global presence are derived from this.

As a globally active technology company, Schunk produces custom-tailored high-tech products and systems in the areas of carbon technology and ceramics, environmental simulation and air conditioning technology, sintered metals and ultrasonic welding. Thanks to its innovative strength and many years of experience, Schunk is a leader in its markets. To align its core competencies with relevant markets, Schunk divides these areas into four divisions: Schunk Carbon Technology, Weiss Technik, Schunk Sinter Metals and Schunk Sonosystems.
